

ENGINEER – EXTERNAL MANDATE (40–60%)

Allegra Sulai Technologies GmbH (AST)

Location: Switzerland / Hybrid

Workload: 40–60%

Engagement: External mandate / Contract basis

Engineering a More Sustainable Future

At Allegra Sulai Technologies, our philosophy is simple: **we want to use technology to help shape a more sustainable and responsible future.**

We develop and explore innovative technology projects in areas such as future mobility, drone technology, energy systems and emerging technologies. Our goal is not only to create new solutions, but to develop projects that have a meaningful and positive impact.

For this reason, we are looking for an Engineer who shares our values and wants to actively contribute to this vision.

Your Role

As an external Engineer at AST, you will support the technical development of selected innovation projects and help transform ideas into practical and viable solutions.

You will work closely with our project management, external specialists, engineering partners and technology companies.

Your responsibilities may include:

- Developing and evaluating technical concepts
- Supporting feasibility studies and prototype development
- Researching suitable technologies, components and solutions
- Helping define technical requirements and project milestones
- Supporting testing, development and optimisation
- Coordinating with external engineering and technology partners
- Contributing your own ideas and technical perspectives

Your Profile

We are open to young and motivated engineers who want to make a difference.

You should have:

- A completed degree in Engineering or a comparable technical field
- Strong interest in technology, innovation and sustainable solutions
- A structured, curious and solution-oriented way of thinking
- Motivation to contribute to meaningful projects with a positive impact on society and the environment
- The ability to work independently and as part of an interdisciplinary team
- Good English skills; German is an advantage

What Matters to Us

We are looking for someone who wants more than just an engineering job.

You should be motivated by the idea of using your technical knowledge to create something meaningful. Sustainability, responsibility and the impact of technology on our future should be topics that genuinely matter to you.

At AST, you will have the opportunity to work on unconventional projects, explore new technologies and contribute your ideas from an early stage.

What We Offer

A flexible external mandate of approximately 40–60%, a high degree of independence and the opportunity to work directly on innovative future-oriented technology projects.

You will become part of a growing network of engineers, specialists and technology partners and have the opportunity to develop together with our projects.

We are looking for people who believe that technology can make a difference.

If you want to use your engineering skills to help create a more sustainable future and contribute to meaningful projects, we would be happy to hear from you.
