

AI SUPPORT SPECIALIST – EXTERNAL MANDATE

Allegra Sulai Technologies GmbH (AST)

Location: Switzerland / Hybrid

Engagement: Project-based external mandate

Creating a More Sustainable Future with Artificial Intelligence

At Allegra Sulai Technologies, our philosophy is to use technology to help create a more sustainable and responsible future.

We develop and explore innovative projects in future mobility, drone technology, autonomous systems, artificial intelligence and emerging technologies. Our goal is to use new technologies in a meaningful way – creating solutions that can improve efficiency, support better decision-making and contribute positively to society and the environment.

For this reason, we are looking for a motivated AI Support Specialist who shares our values and wants to actively contribute to future-oriented projects.

Your Role

As part of our external technology network, you will support AST on a project-based mandate, depending on the scope and requirements of each individual project.

Your responsibilities may include:

- **Supporting the integration and application of AI tools**
- **Researching suitable AI technologies and solutions**
- **Assisting with automation and process optimisation**
- **Supporting data analysis and AI-based evaluations**
- **Testing and comparing AI applications**
- **Helping develop practical AI-supported workflows**
- **Collaborating with external technology and engineering partners**
- **Bringing your own ideas and perspectives into our projects**

Your Profile

Professional experience is not required. What matters most to us is your technical understanding, curiosity and motivation to work with artificial intelligence.

You should have:

- **A completed degree or relevant higher education in Computer Science, Data Science, Engineering, Artificial Intelligence or a comparable field**
- **Strong interest in AI, automation and future technologies**
- **A curious, structured and solution-oriented mindset**
- **Motivation to contribute to meaningful and sustainable technology projects**
- **The ability to work independently and as part of interdisciplinary teams**
- **Good English skills; German is an advantage**

What Matters to Us

We are looking for someone who sees artificial intelligence as a tool to create real value.

You should be interested in how AI can improve processes, support innovation and contribute to more efficient and sustainable solutions.

At AST, you will have the opportunity to work on unconventional projects, explore new technologies and contribute your knowledge from an early stage.

What We Offer

A flexible, project-based external mandate with a high degree of independence and direct involvement in innovative technology projects.

You will work within a growing network of engineers, technology specialists and external partners and contribute your expertise according to your availability and the needs of each project.

We are looking for people who believe that technology can make a difference.

If you are passionate about artificial intelligence and want to use your skills to contribute to meaningful and sustainable projects, we would be happy to hear from you.
